Abstract (en)
[origin: US2016167109A1] A cylinder for storing a plurality of rings to be crimped, said cylinder comprising a base body including a distribution outlet, a main cylindrical body mounted so that it can rotate along a cylinder axis relative to said base body in a plurality of angular positions, said main cylindrical body comprising a plurality of sheaths which are parallel to one another and each suitable for accommodating a plurality of rings, each sheath being arranged so as to lead to said distribution outlet of said base body for a predetermined angular position of said main cylindrical body.

Abstract (fr)
Un barillet (2) pour le stockage d'une pluralité de bagues (1) à sertir, ledit barillet (2) comportant un corps de base (20) comprenant une sortie de distribution (21), un corps principal cylindrique (22) monté rotatif selon un axe de barillet (X2) par rapport audit corps de base (20) selon une pluralité de positions angulaires, ledit corps principal cylindrique (22) comportant une pluralité de fourreaux (23) parallèles les uns aux autres et adaptés pour recevoir chacun une pluralité de bagues (1), chaque fourreau (23) étant agencé pour déboucher sur ladite sortie de distribution (21) dudit corps de base (20) pour une position angulaire déterminée dudit corps principal cylindrique (22).
