Abstract (en)

[origin: CN205795320U] The utility model relates to an assembly subassembly of traction device (9), these traction device (9) structures for door (5) that make household implement (1) and arrange in the front side door (5) before (8) the coupling of furniture front bezel and take. Install on household implement's door (5) director element (20) of traction device (9), and install on furniture front bezel (8) slide rail (10) of traction device (9). Director element (20) and slide rail (10) are the with respect to each other location so for slide rail (10) can produce the scarf joint with director element (20). Make director element (20) to fix on door (5) in first step, and make slide rail (10) fix in one follows the second step of first step on the time to keep on furniture front bezel (8).
