Abstract (en)
[origin: EP3032636A1] This document discloses a resonator assembly comprising: a first ceramic resonator article (100) having determined radio frequency resonance characteristics; a second ceramic resonator article (102) having determined radio frequency resonance characteristics; a coupling sheet (104) attached between the first ceramic resonator article (100) and the second ceramic resonator article (102), wherein the coupling sheet (104) is made of electrically conductive material and comprises a pattern in the form of at least one through hole (106) for tuning properties of the resonator assembly.
