Abstract (en)  
[origin: WO2015023551A1] The present invention discloses and claims methods and compositions for the treatment of platinum and/or taxane cancer treating agent-resistant-refractory sub-populations and/or the mucinous adenocarcinoma sub-type of ovarian cancer subjects with the silicon-containing highly lipophilic camptothecin derivative (LCD), Karenitecin (also known as BNP1350; cositecan; 7-[(2'-trimethylsilyl) ethyl]-20(S) camptothecin). The administration of Karenitecin by intravenous (i.v.) and/or oral methodologies are also disclosed and claimed.
