Abstract (en)

[origin: WO2015022665A1] The present invention relates to a covering panel intended to be mounted on or fixed to a surface, in particular to ensure a "screen" effect, comprising a sheet (1), preferably rectangular, that is held by its edges in a rigid frame, preferably metallic, that consists of joined-together profiled elements, characterized in that the frame comprises two uprights (2) that are able to be placed on or fixed to a surface, having at least one groove (5) on the inside, the uprights (2) being joined to cross members (3, 3') by assembly parts in the form of an angle bracket (6) that is inserted in each case into a groove in a corresponding upright by way of one bearing surface (7) and into a groove in a corresponding cross member by its other, preferably orthogonal bearing surface (7').
