Abstract (en)

[origin: WO2015022057A1] The invention relates to a method for determining at least one injection parameter of an internal combustion engine (1) comprising the following steps: detecting a pressure profile in a time-resolved manner in an injection system (3) of an internal combustion engine (1) at least during an injection; providing a reference pressure profile for at least one operating point of the injection system (3); comparing the detected pressure profile with the reference pressure profile, and ascertaining at least one injection parameter as a function of the comparison.
