Abstract (en)

[origin: WO2015022370A1] The invention relates to an electrical base strip (10), in particular to be fitted to a plug (62), having a plug face (12) which has at least two adjacent chambers (14), each with a plurality of electrical contacts (16), for connection to a corresponding plug connector (40), wherein the base strip (10) has at least one first receptacle (24) for a first coding component (34) in at least one region (22) between two adjacent chambers (14). The invention also relates to a coded base strip (32) with an electrical base strip (10) of this kind and at least one first coding component (34), wherein the first coding component (34) is accommodated in a first receptacle (24) of the electrical base strip (10). The invention further relates to a plug (62) having at least one electrical base strip (10) of this kind.
