Abstract (en)

A cap assembly for closing a bottle or the like comprises a cap body (2) adapted to be screwed onto a threaded bottle (10), wherein the cap body (2) is protected by a corresponding cap cover (6) of the double-walled type. The cap cover (6) is provided with retention means that comprise a circumferential tab (12) that protrudes from the lower rim of the cap cover (6) and are adapted to retain the cap cover (6) with respect to the cap (1).
