Abstract (en)  
A bricklaying jig for use in laying bricks on a lintel having a support member for supporting one or more courses of bricks, the jig comprising a first, mounting section by which the jig is mounted to a lintel and a second, support section by which a guide is supported on the jig so as to retain one or more courses of facing bricks in alignment to the lintel, wherein the mounting section includes a projection which is configured to locate between side faces of two adjacent bricks.
