Abstract (en)

[origin: EP3034720A1] A lock device (1,2) for a double door (55) comprises a first lock part (1) for mounting on a first wall (56a) of a first door (56) of the double door (55), which first lock part (1) comprises a first exterior part (3) and a first interior part (4), a second lock part (2) for mounting on a second wall (57a) of a second door (57) of the double door (55) for locking together with the first lock part (1) in closed position of the double door (55), which second lock part (2) comprises a second exterior part (42) and a second interior part (43), and a lock. The first lock part (1) comprises a first bolt means (5,5a,5b,5c) having a first length selected to screw the first exterior part (3) and the first interior part (4) together through the first wall (56a) of the first door (56). The second lock part (2) comprises a second bolt means (48,48a,48b) having a second length selected to screw the second exterior part (42) and the second interior part (43) together through the second wall (57a) of the second door (57), and the first interior part (4) has female interlocking and/or engagement means (7) for engaging male interlocking and/or engagement means (45) of the second interior part (43). The lock device is particular useful on storage containers to prevent intrusion and theft.
