Abstract (en)
An emergency exit assembly comprises first (1) and second (5, 105) push-button units and an elongate flexible connecting means (3) to connect the push-button units. The first push-button unit (1) is adapted on operation to release a first end (9) of the connecting means (3) to allow the connecting means to be withdrawn from the first push-button unit when released. The second push-button unit (5, 105) is adapted on operation to release and eject a second end (11) of the connecting means from the second push-button unit.
