Abstract (en)

A fixation device (1) for releasable fixation of shelf accessories (60, 70) to a shelf and comprising an elongated profile element adapted to be mounted along the front edge of a shelf. The profile element comprises a mounting portion (20) provided with mounting means (21,22, 23) adapted to engage the front edge of a shelf; and a first fixation portion (40) having a first (42) and a second edge (43) and being provided with first fixation means (44, 45,46) adapted to engage with a plurality of first accessories (60) for releasable fixation of the first accessories to the fixation device. The first fixation portion (40) is , at the first edge (42), pivotally connected to the mounting portion (20) and movable relative to the mounting portion between a first angular position, at which the second edge (43) of the fixation portion (40) is arranged proximal to the mounting portion (20) and a second angular position, at which the second edge (43) is arranged distal to the mounting portion (20). The mounting portion (20) and the first fixation portion (40) are provided with first angle retention (50) means for retaining the fixation portion (40) in the second angular position.
