Abstract (en)
[origin: WO2015025020A1] The invention relates to a printing apparatus for applying a printing medium to at least one printing substrate, wherein the printing apparatus (1) comprises at least one first printing module (2), wherein the first printing module (2) comprises at least one printing head (3a, 3b, 3c, 3d, 3e), wherein the printing apparatus (1) comprises at least one printing substrate holder (5), wherein the first printing module (2) can be moved in a printing direction (4) relative to the at least one printing substrate holder (5) of the printing apparatus (1), wherein the first printing module (2) can also be moved transversely to the printing direction (4) relative to the printing substrate holder (5) of the printing apparatus (1), wherein the printing substrate holder can also be moved along a closed path. The invention further relates to a method for applying a printing medium.
