Abstract (en)

[origin: EP3037672A1] The present invention relates to an adapter (404) for a suction device (401) comprising an electric motor (402) that drives an impeller (403) and further comprising a volute (201) that houses said electric motor (402) and said impeller (403), such adapter (404) comprising a substantially rectangular first shaped end (501) configured to engage with said electric motor (402), and further comprising a substantially circular second shaped end (502) configured to mate with the volute (201); the adapter (404) further comprises a plurality of through holes (503) for fastening the electric motor (402) to the volute (201). Furthermore, the present invention relates to a related suction device (401) and a related range hood (101).
