Abstract (en)
The present invention relates to a home appliance (1) having a body (10), a flange (11) provided on said body (10), and a panel (30) connected to said flange (11). As an improvement, the present invention is characterized in that, it comprises a support element (40) which at least partially fills the clearance left between the flange (11) and a front wall (31) of the panel (30) when the panel (30) is mounted to the flange (11).
