Abstract (en)
[origin: US2016179059A1] The present invention concerns an assembly for holding or supporting a timepiece balance spring including a balance spring stud and a stud-holder, wherein said stud-holder includes: a base comprising an upper face and a lower face extending along a longitudinal axis; characterized in that the base includes a lug of non-constant shape protruding from one of the faces, said assembly further comprising a holding plate including a first opening and a second opening separated by a deformable arm, with the stud engaging in the second opening.

Abstract (fr)
La présente invention concerne un ensemble de maintien ou d'appui d'un ressort spiral d'horlogerie, comportant un piton et un porte-piton, lequel porte-piton comporte : - une base comprenant une face supérieure et une face inférieure s'étendant selon un axe longitudinal; caractérisé en ce que la base comprend un plot de forme non constante faisant saillie de l'une de ces faces, ledit ensemble comprenant en outre une plaque de maintien comportant une première ouverture et une seconde ouverture séparées par un bras déformable, le piton s'engageant dans la seconde ouverture.
