Abstract (en)  
[origin: WO2015030633A2] A smart device cover for a smart device comprising a front cover assembly, a secondary display on the front cover assembly, an attachment mechanism for hingely attaching the front cover assembly to the smart device and a data communication interface for receiving data from the smart device, the received data triggering display of an image on the secondary display. A method and a smart device cover provided to a smart device. At the smart device cover, pairing with the smart device, receiving at least partial data from the smart device destined to be displayed or to trigger display of an image on a secondary display of the smart device cover, processing the received data into a suitable rendered image for the secondary display and displaying the rendered image on the secondary display.
