Abstract (en)
[origin: WO2015030634A1] A method implemented by a computer device for displaying text content associated with a notification, the method comprising: receiving the notification containing the text content; identifying a matching text portion in the text content with a predefined text stored in a storage; generating an amended notification by combining at least a portion of the text content with a representation image associated with the predefined text; and sending the amended notification for subsequent display on a display of a user interface.
