Abstract (en)
The object of the invention is a device to fasten and level sanitary fittings onto walls (8), comprising: a laminar body (1), which comprises a front side and a rear side (1.2); two profiles (7) which are part of the laminar body (1); fastening orifices (2, 3) to fasten the device to the wall (8), comprising: a central orifice (2), lateral orifices (3), levelling means (5, 6) arranged in the laminar body (1), each of which being individually adjustable throughout its length with respect to the rear side (1.2) and providing support against the wall (8); such that the device has fastening and levelling features with respect to the three coordinate axes (X, Y, Z) by means of the combined adjustment of the fastening orifices (2, 3) and the levelling means (5, 6).
