Abstract (en)

A floor screed reinforcement means for use in a non-structural floor, the reinforcement means comprising at least two reinforcing meshes each having a grid like pattern, at least one spacing means engaging with the reinforcing meshes for spacing apart the reinforcing meshes, the spacing means further extending from the reinforcing meshes to space, In use, a lower reinforcing mesh above a base on which the floor screed material will be laid, and further extending above an upper reinforcing mesh and providing indicator means which is at least covered by the floor screed material.
