Abstract (en)
A support for a panel of an in-wall retractable sliding door or a sliding door positioned close to the ceiling, which is constituted by a bracket (3), which can be associated with a recess (4) provided longitudinally with respect to the first upper surface (5) of the panel (2) proximate to a first lateral surface (6) thereof; the bracket (3) is slideably associable with a square first head (13) of a first screw (14) which is associable with a trolley (11) for the sliding of the door or with a ceiling support; the first head (13) interacts with a stop element (17) associated with the bracket (3) and with means adapted to eliminate the tolerance between the first head (13) and the bracket (3), which comprise an insert (18); means are provided for locking the position of the insert (18) with respect to the bracket (3).
