Abstract (en)

The present invention is a home appliance (1) comprising a body (11) made of metal material having an insulator layer (40); an electrical functional element (12) coupled to the body (11) from a connection tip; an earthing element (9) having an earthing terminal (8) connected onto the body (11). The home appliance (1) comprises a band (3) for providing earthing of the electrical functional element (12) and having a conductive layer (31) extending on the body (11) from the connection tip of the electrical functional element (12) towards the earthing terminal (8) of the earthing element (9) so that an earthing connection is provided between the connection tip of the electrical functional element (12) and the earthing terminal (8).
