Abstract (en)

System arrangement for optical reproduction of traffic information having at least one information transmitter positioned on a traffic route and at least one optical information reproduction device. A controller having information receivers, the controller is connected to the information transmitter, preferably integrated therein, and the information transmitter has a transmission and/or projection unit, which projects traffic information, which is received by the information receiver and to be reproduced, on the reproduction device or transmits said traffic information thereto. The reproduction device is spatially separated from the information transmitter.
