Abstract (en)

[origin: WO2015034520A2] The present invention provides a lightweight knit fabric, having a knit structure prepared from at least 80 wt% of one or more yarns having a hydrophobic surface containing less than 1 part hydroxyl group per 10 million parts of (co)polymer forming the one or more yarns, and articles prepared therefrom, which provide efficient moisture transport and cooling effects on a subject in contact therewith.
