Abstract (en)
[origin: EP3042765A1] The present invention provides a double-sided adhesive sheet with which non-adhesive printed matter such as an advertisement can be attached to an adherend as a display object without using a pressure-sensitive adhesive, or the like, wherein air remaining is unlikely to occur when the sheet is attached to the adherend. The present invention is an electrostatic adsorbable sheet which is laminated by means of electrostatic adsorption, a protective layer (B) comprising a dielectric film on at least one surface of a support layer (A) comprising a thermoplastic resin film having undergone charging treatment; and an electrostatic adsorbable sheet which is laminated by means of electrostatic adsorption, a protective layer (B) comprising a dielectric film having undergone charging treatment on at least one surface of a support layer (A) comprising a thermoplastic resin film.
