Abstract (en)

[origin: EP3043250A1] [Object] To provide an information processing apparatus, an information processing method, and a program, each of which is new and improved and is capable of improving the operability for selecting an object image. [Solution] According to the present disclosure, there is provided an information processing apparatus, including: a determination unit configured to determine whether or not an input operation amount input to an input operation unit has exceeded an operation amount threshold; a control unit configured to set one of a plurality of object images displayed on a display unit as a selection target object image and change the selection target object image if the input operation amount has exceeded the operation amount threshold; and a setting unit configured to set the operation amount threshold to a first value before a first change in the selection target object image is performed and set the operation amount threshold to a second value larger than the first value after the first change in the selection target object image is performed.
