Abstract (en)

[origin: WO2015036215A1] The invention relates to a printing system for printing bottles or similar containers (2), having a moving printing system part (10), on which there is provided at least one electric print head (3, 3a) operating on the inkjet principle and movable along a transport section for the containers (2), preferably movable in circulation, for printing the respective container (2) arranged at a printing station (4.1), and a static printing system part (8), not moved together with the print head (3), which has at least one tank (100) for holding printing color or ink to be supplied to the print head (3).
