Abstract (en)
[origin: WO2015036170A1] The invention relates to a boat drive (1) having an underwater housing (10) arranged outside of a boat body (7) and such that it can pivot relative to the boat body (7) about a vertical pivot axis (11), in which housing at least one propeller shaft (13) is drivably mounted, and having a pivot drive, which is arranged in the interior region (6) of the boat body (7), for pivoting the underwater housing (10) for the purpose of controlling the direction of the boat. On an element of the pivot drive is provided a zero position mark (25) with which it can be easily determined when the underwater housing (10) is in a zero position.
