Abstract (en)
[origin: WO2015036203A1] The invention relates to a device for cleaning at least one glue roller (9) of a labelling station (6) for applying labels to containers or bottles (2), in which device at least one carrier unit (8) is arranged spaced apart from the glue roller (9), which carrier unit (8) is configured for receiving a preferably multiple-piece vacuum drum (7), wherein the vacuum drum (7) is operatively connected to the glue roller (9). A cleaning unit (10) which is configured as an insertable module is particularly advantageously provided for cleaning the glue roller (9), which cleaning unit (10) can be inserted into the carrier unit (8) instead of at least one part or segment of the vacuum drum (7).
