Abstract (en)
[origin: WO2015036535A1] A beverage dispensing device for dispensing beverages is provided. The beverage dispensing device comprises a beverage dispensing device for dispensing beverage from a beverage container to an outlet, comprising a receptacle for a beverage container made from deformable material, said receptacle being defined by means for deforming the beverage container in order to expel beverage stored therein; a dispensing line fluidly connecting the beverage container and an outlet, the dispensing line having a first inner diameter; an actuator arranged at the outlet in connection with the dispensing line adapted for opening and closing the fluid connection between the beverage container and the outlet; wherein means for measuring a pressure of the beverage in the beverage container and/or in the dispensing line is arranged in connection with the beverage container and/or the dispensing line, the measured pressure being used for controlling the means for deforming the beverage container, so that a predetermined pressure of the beverage at the outlet is attained.
