Abstract (en)
[origin: WO2015032604A1] The invention relates to a withdrawal system (1) for filling and emptying containers and comprising a container closure (2) which is inserted into a container opening of a container receiving a bung head. A dip tube (4) connected to the bung head comprises a withdrawal connection element which is connected to the dip tube (4) or the bung head. A transponder generating a transponder signal is provided. A monitoring signal is generated in accordance with the transponder signal, which indicates whether the connection of the withdrawal connection element to the container is permitted.
