Abstract (en)
[origin: WO2015036538A1] The present invention relates to a connecting device (1) for connecting an outlet of a beverage dispensing system (100) via a dispensing line (23) having a first inner diameter (D1) to a beverage container (27), the connecting device (1) comprising a first part (3) having a first fluid channel (6) and piercing means (7) adapted to pierce a membrane (28) of the beverage container (27), and a second part (8) having a second fluid channel (11) and a first projecting element (12), the second part (8) being adapted to be connected with the dispensing line (23), the first part (3) being connected with the second part (8) to provide fluid communication between the first fluid channel (6) and the second fluid channel (11), the first and second parts (3, 8) being connected by the first projecting element (12) engaging into a corresponding recess (13) or groove arranged at the first part (3), wherein the first part (3) comprises a second projecting element (15), the second projecting element (15) being adapted to engage into corresponding engagement means (25) arranged on the beverage container (27).
