Abstract (en)
[origin: WO2015036305A1] The invention relates to an electrical plug-type connector comprising a housing (10) for holding electrical plug elements, and comprising a pulling aid (2) made of an electrically insulating material, which enables the plug-type connector (1) to be pulled apart from a mating connector (101), and which protrudes from the housing (10) of the plug-type connector (1) in the form of a tab (20). The pulling aid (2) is provided with an electrically conductive portion (3) which is designed and provided as a screening support for the screening of an electrical lead that is to be connected to the electrical plug-type connector (1).
