Abstract (en)

[origin: EP3045609A1] The invention relates to a roof window or hatch comprising preferably two mutually symmetrical fixing assemblies for the upper casing, wherein the fixing assembly consists of fixing element 1 mounted on universal bracket 2, which is an element made of structural metal sheet by bending of flat blank, and comprises stem 21 and mounting arm 22, serving as a holder for mounting of side casing 3 and fixing element 1; stem 21 basically has a shape of an angle bar with mounting holes arranged for screws or other connecting media, and has arm I 211 adjacent to upper sash member 41 of frame 4 and constituting a base for fixing holder 5 for a gas spring, and arm II 212 of stem 21 is adjacent to side frame member 42 of the sash and is fixed to it; mounting arm 22 is a flat element bent off arm II outwards, in parallel to the sash plane.
