Abstract (en)
The invention relates to a lighting fixture (10) comprising a housing (20), at least one LED (31) provided in the housing. The housing comprises a light exit opening (21) for the light emitted by the at least one LED, and a scrolling assembly (40). The scrolling assembly comprises a first spool (41) and a second spool (42) and a sheet (50) extending between the two spools (41, 42). The scrolling assembly is configured to scroll the sheet (50) from one of the spools to the other of the spools. The sheet (50) comprises different sections (50a-c), each section containing a different phosphor composition. The scrolling assembly is attached to the housing in such a way that the light of the at least one LED passing through the light exit opening passes through the sheet.
