Abstract (en)

[origin: WO2015036146A1] The invention relates to a device for producing packaging units in a form, fill and seal machine having a horizontal conveying device for transferring individual products (14) to a portioning device (15) for producing portions (12) that have a defined arrangement and number of products, and having a vertical conveying device (22) for conveying the portions wrapped in a film web (11) to a separating device for separating the packaging units, the vertical conveying device having two parallel belt conveyors (34, 35) which each have a plurality of support devices arranged in the conveying direction (17) for supporting the conveyor belts along the conveying channel.
