Abstract (en)

[origin: WO2015039984A1] The invention relates to a method for operating an elevator control device (16), wherein the elevator control device (16) automatically sends a code (44) to a programming device (34) when the elevator control device (16) is accessed by the programming device (34), wherein the elevator control device (16) expects the previously sent code (44) to be entered at a control panel (20, 22) comprised by the elevator control device (16) or associated with the elevator control device (16) within a specified or specifiable entry time period and wherein the elevator control device (16) enables the access to the elevator control device (16) if the previously sent code (44) has been correctly entered within the entry time period.
