Abstract (en)

[origin: WO2015039869A1] The invention relates to a spacer (1) for a reinforcement layer (16), a reinforcement system (29) for a concrete component (21), and a method for producing a reinforcement system (29). Said spacers (1) allow especially mesh-type reinforcement layers (16) to be kept at a distance from other bodies (24, 28) in a particularly simple manner. In order to mount the spacers (1), the same are inserted into a mesh (8) of the reinforcement layer (16) and are connected thereto by twisting.
