Abstract (en)  
[origin: CN105795510A] The invention relates to a conveyor drum in the tobacco industry, which is provided with lever arms pivotable in the circumferential direction of the conveyor drum, wherein the lever arms each having one or more receptacles for rod-shaped articles, wherein the lever arms are pivotable by means of a pivoting link, wherein the lever arms are controlled movable by the pivoting link, in a transfer area for the rod-shaped article, between a receiving portion for receiving rod-shaped articles in the receptacles and a discharge area for discharging the rod-shaped articles from the receptacles during rotation of the conveyor drum. Here, the pivoting link for the lever arms has at least two sections, wherein a first section for the movement of the lever arms in conveyance of articles of a first type and a second section for the movement of the lever arms in conveyance of articles of a second type are provided in the transfer area and the pivot link is adjustable so that the products of the first type at least in the discharge area of the first section of the pivoting link is effective or products of the second type at least in the delivery area of the second gate section is effective.
