Abstract (en)

[origin: EP2679507A2] The container (1) has a shoulder area (4), which is widened along a longitudinal direction of the container from an aperture area (2) along a direction of a main body (6). A transition area is provided between the aperture area and the shoulder area, where the transition area has a portion widening along the longitudinal direction of the container from the aperture area in the direction of the shoulder area and having a straight course. A base area (8) is adjoined to the main body in the longitudinal direction of the container.
