Abstract (en)

[origin: WO2015044310A1] The invention relates to a stationary device, which is mounted on at least one hydraulic and/or pneumatic suspension element, for treating and/or processing bulk material in the bulk material processing industry. The at least one suspension element is hydraulically and/or pneumatically regulated and/or controlled dependent on the position and/or speed and/or acceleration and/or weight, whereby at least one perpendicular positioning of the device can be adjusted.
