Abstract (en)

[origin: WO2015044321A1] The invention relates to a driving assistance device for a motor vehicle (20), said assistance device comprising a variable light-transmission screen (28) intended to be disposed between the road scene (SR) and the driver (24) of the vehicle, and means (30) for controlling a transmission coefficient of the variable transmission screen (28). According to the invention, the screen (28) and the control means (30) are configured such that they can be installed on board the vehicle as different components of an after-sales product.
