Abstract (en)
[origin: WO2015043605A1] A joint system comprising a number of distinct profiles which together provide a complete joint system, where said system at least comprises: - a first profile having two sides where said profile has a cross section in the general shape of a V, where one leg of the V is longer than the other leg, and where the distal edges of the profile are bent away from the other side, creating bent side portions; - a second profile having two sides of substantially the same length from the bottom of the V where said profiles are made from a resilient metal or metal alloy.
