Abstract (en)
[origin: WO2015043705A1] The invention relates to a motor vehicle door handle for locking and/or activating a door of a motor vehicle, having a handle housing (1) and a pulling handle (2) arranged in the handle housing (1), wherein in a closed position the pulling handle (2) terminates flush with the handle housing (1) and/or rests in the handle housing (1) and can be moved into an operating position in which the pulling handle (2) protrudes outward from the handle housing (1) and it can be gripped from the rear, wherein when the pulling handle (2) is pulled manually in the operating position the door lock and/or the door opens, wherein the pulling handle (2) has two articulation points (21, 22) spaced apart from one another, wherein the pulling handle (2) is mounted at the first articulation point (21) in an articulated fashion at one end of a first rotary lever (10), and is mounted spaced apart therefrom at the second articulation point (22) in an articulated fashion at one end of a second rotary lever (20), wherein the two rotary levers (10, 20) rotate about rotational axes (11, 12) in order to move the pulling handle (2) from the closed position into the operating position.
