Abstract (en)

[origin: WO2015043626A1] The invention relates to a spacer (1) for spacing glass panes of a multi-glazed window, comprising a main body (2) having an outer face (3), an inner face (4) which can be directed towards the intermediate space between the glass panes, and two end faces (5) each intended to receive a glass pane, and a vapour barrier film (6) which is applied to the main body (2). The main body (2) comprises a drying means, and the vapour barrier film (6) surrounds the main body (2) on the outer face (3) and at least partially on the end faces (5). The invention further relates to a multi-glazed window having such a spacer and a vapour barrier film and to a method for producing a vapour barrier film and a multi-glazed window.
