Abstract (en)

[origin: WO2015044393A1] The invention relates to a method for processing transactional data, via a payment terminal. According to the invention, such a processing method comprises: a step of capturing (10) at least one datum representing a bill to be paid (DRAGR), called a consolidated datum, from a pre-existing support (FR); a step of formatting (20) the consolidated datum by a collection application of said payment terminal, delivering a digital bill (FactN); a step of displaying (30) said digital bill (Fact N) by means of said collection application; at least one step of transmitting (40), to a payment application of said payment terminal (AppP), at least one datum, called a transactional datum, representing an amount to be paid (S) according to at least one element (E) of said digital bill.
