Abstract (en)
[origin: EP3050816A1] The invention provides a pallet (1) comprising a main body (2) with a front surface (21) intended for receiving goods, a rear surface opposite the front surface (21) and a lateral perimeter (22), a plurality of shoes (3) fixed to the main body (2) by connection means (4), a first cavity comprised in the main body (2) with an inlet (5) located on the lateral perimeter (22) and a stiffening element (14) housed in this first cavity. The invention further comprises at least one securing element (6) fixed to the inlet (5) of the cavity and the stiffening element, where the securing element (6) comprises first fixing means adapted for being fixed to the stiffening element, and second fixing means adapted for being fixed to the inlet (5) of the cavity.
