Abstract (en)

[origin: WO2015049242A1] The invention relates to a method for manufacturing an exterior vehicle component (1), having the following steps: providing a base component (2) made of thermoplastic plastics in an injection-moulding tool by injecting a thermoplastic material into the injection-moulding tool or by laying a prefabricated base component made of a thermoplastic material into the injection-moulding tool, and injecting a covering layer (4) made of a scratch self-healing plastic material into the closed injection-moulding tool in order to coat the base component (2), and to an exterior vehicle component, in particular a vehicle exterior component manufactured according to this method.
