Abstract (en)
[origin: WO2015050490A2] A pallet collar (12) for a pallet (1), comprising a first element (13), a second element (14), a third element (15) and a fourth element (16), wherein the pallet collar (12) is foldable, and wherein a bottom side and a top side (21) of the elements (13-16) is provided with protrusions (22) and recesses (20), respectively, which recesses (20) are arranged for receiving protrusions (22) of an adjacent pallet collar. The first element (13) and the second element (14) comprise inner protrusions (22a) outer protrusions (22b), wherein a height of the outer protrusions (22b) is arranged so that they are disengaged from corresponding recesses (20) of an adjacent pallet collar when the third element (15) is lifted from an underlying pallet collar to disengage the inner protrusions (22a) while the fourth element (16) simultaneously engages the underlying pallet collar. The invention is also related to a goods support with such pallet collars and methods for assembly and disassembly thereof.
