Abstract (en)

[origin: WO2015049152A1] The invention relates to a method for identifying a parameter of a coolant circuit of a vehicle, in particular of a motor vehicle, wherein a coolant pump (3, 4) of the coolant circuit is used as a sensor (3, 4) and the parameter of the coolant circuit is identified via an electronic apparatus (11) of the vehicle. The invention further relates to an electronic apparatus (11), preferably a control unit (11) or a control apparatus, for a vehicle, in particular a motor vehicle, which is designed such that a method according to the invention can be carried out by the electronic apparatus.
